From Ton. 11,0

The GRI rotator consists of 7 structural parts assembled without welding.

Il rotatore GRI è composto da 7 elementi strutturali assemblati senza alcuna saldatura.

The oil passages have been fitted within the structure

I passaggi dell'olio sono stati ricavati all'interno della struttura.

Solid casings protect all the components from knocks and any materials which could damage the mechanical components.

Robusti carter proteggono tutti i componenti da urti ed eventuali materiali che potrebbero danneggiare i componenti meccanici.

To power the cylinders, we have created a special rotating distributor integrated into the rotator. By doing this we have got rid of the flexible tubes which connect the rotator to the grabs.

Per alimentare i cilindri, abbiamo creato uno speciale distributore rotante integrato nel rotatore. In questo modo abbiamo eliminato i tubi flessibili che collegano il rotatore all benne.
