

Hyva hydraulic oil tanks

Hyva offers a complete range of state of the art oil tanks, both steel and aluminium. The design of the tanks is fully adapted to the modern trucks and tractors. The available tank supports, straps and profiles make fitting very easy. Our oil tanks are robot welded to secure constant quality. Most tanks are equipped with a 10 micron air breather filter integrated in the filler cap and an oil level indicator. The optional return line filter has a 25 micron filter with an efficiency of 98,7%. To complete your hydraulic kit, Hyva can supply all necessary components related to our hydraulic oil tanks like straps, nuts, tank supports, rubbers, vibration dampers, suction hoses, high pressure hoses, bolts, filler caps, adapters, ball valves and hose pillars (for straight and 90° mounting).

The multifunctional tanks; marked MR are fitted with a covered opening which can accommodate a return filter (Mounting plate-Return filter).

Hyva offers oil tanks for mounting behind the cabin on the chassis (RM) or on a cradle (CM), for side mounting (SM) and mounted by a top flange (TM). For each hydraulic system on all types of trucks Hyva has a suitable oil tank, both supplied in steel as well as in aluminium. Hyva tanks are standard equipped with a 1½" BSPOT or 1½" BSPIT suction connection and in general with a Hyva tipping valve mounting plate with a ¾" BSPIT connection.

Steel oil tanks

The following tanks are available in steel:

Side mounted tanks

The SM-range consists of oil tanks with a volume ranging from 12 to 200 litres. SM tanks can be fitted with a return filter when using the Mounting plate-Return filter. In general, the PT-valve can be mounted on the side. To guide the return flow from the tipper valve through the return filter on top of the tank we have created kit L211. This 1¼ inch hose is flexible and can be mounted under the sharp 90 degree corner between valve and filter. The kit is complete with adapters and bonded seals and plug (14799175) to close the tank port on the valve.

Cradle mounted tanks

The CM-range consists of oil tanks with a volume ranging from 18 to 117 litres.

Top flange mounted tank

The TM-range consists of oil tanks with a volume ranging from 43 to 85 litres.

Rear mounted tanks

The RM-range consists of oil tanks with a volume ranging from 65 to 213 litres.

Aluminium oil tanks

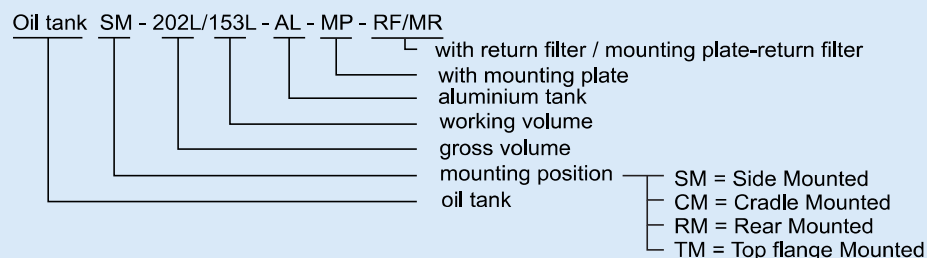

Side mounted tanks

The SM(ALU)-range consists of oil tanks with a volume ranging from 110 to 200 litres. These oil tanks are made of high quality aluminium and are light weight. SM tanks can be fitted with a return filter when using the Mounting plate-Return filter. The PT-valve can be mounted on the side. To guide the return flow from the tipper valve through the return filter on top of the tank kit L211 can be used.

Hydraulic tanks

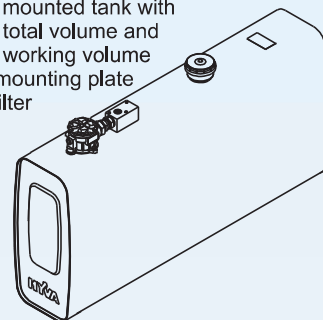

In this overview you can find everything about the oil tanks: the coding, the kits and the parts. Also we present you a 'How to order' system, so you can choose your own suitable oil tank and kit in an easy way.

Code system oil tanks

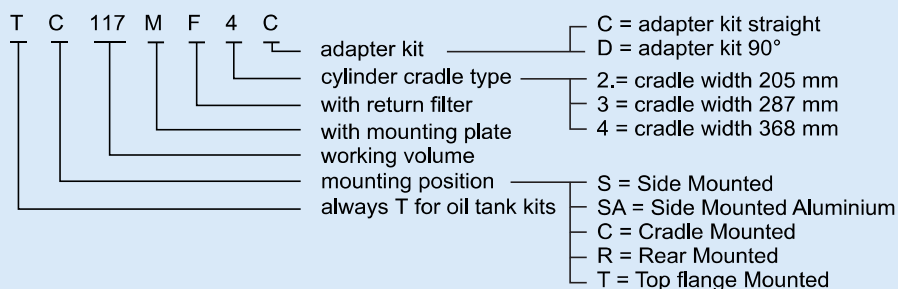

Oil tank RM-252L/213L-MP-RF

Rear mounted tank with 252L total volume and 213L working volume with mounting plate and filter

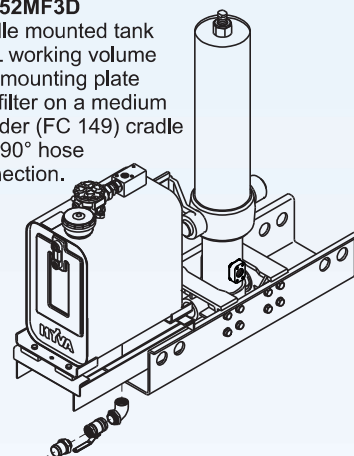

The description of the oil tank is corresponding with the way to choose the correct oil tank. At first the type of tank is chosen, then the gross and working volume. The working volume of the tank must be larger than the gross volume of the cylinder. The material of the tank is the next step. The last two codes explain whether the tank has a valve mounting plate and/or a tank return filter.

Code system oil tank kits

DC052MF3D

Cradle mounted tank 052L working volume with mounting plate and filter on a medium cylinder (FC 149) cradle with 90° hose connection.

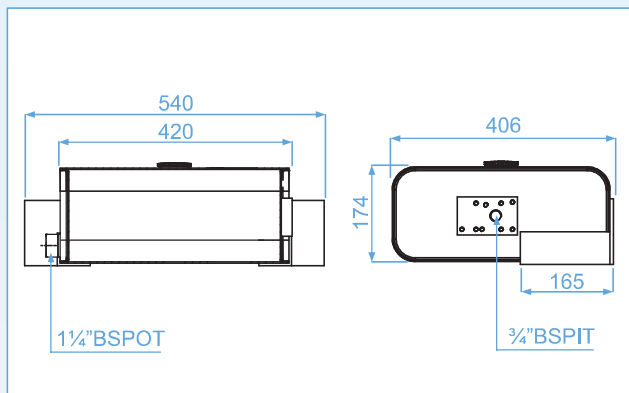

Hyva Oil Tanks

SM-tank mounting parts

Side mounted oil tank mounting parts

Part no.	Description
140 20 130	Strap for oil tanks 140 18 225
140 20 140	Rubber for strap for tanks 140 18 225
140 20 150	Tank support for oil tanks 140 18 225
020 52 431	Cover plate return filter hole SM-tank
020 52 432	Gasket for cover plate MF tank

Side mounted oil tank mounting parts

Part no.	Description
140 20 160	Mounting equipment for 706x636 SM oil tanks
	Consisting of:
081 02 116	Air breather filter
140 20 300	Strap for oil tank 706 x 636 (2x)
140 20 328	Rubber kit for 2 straps 706 x 636 (1x)
140 20 320	Tank support for oil tank 706 x 636 (2x)

Tank return filter kit for SM-tanks

Part no.	Description
147 80 303	Return filter kit for SM(MR)-tanks with pipe 350mm

Hyva Oil Tanks

SM-tank mounting parts

Light weight spacers for mounting SM tanks on an S-shaped narrowed chassis

Part no.	Description
010 40 002	Spacer 295x60x40mm for MAN
010 40 003	Spacer 295x60x27mm for MAN
010 40 004	Spacer 160x60x8mm for RENAULT
010 40 005	Spacer 230x60x20/16mm for MERCEDES
010 40 006	Spacer 230x60x6/2mm for MERCEDES
